TCMD INTERNATIONAL TRAINING IN DIAGNOSIS AND THERAPY OF CRANIOMANDIBULAR DISORDERS -- Specialist in CMD --

Craniomandibular Disorders (CMD) represent a significant health problem in the population. In recent years numerous therapeutic approaches have been established for the treatment of CMD. Nevertheless, in some cases, you do not archive the desired success. Reasons for this are the complexity of the disease and the requirement for a greater diagnostics and inter-disciplinary coordination by the clinician.

- Module 1** Introduction of CMD Kiel Concept, Classification of CMD, Anatomy, Head and Pain Pathophysiology
- Module 2** Clinical Reasoning, Anamnesis, Occlusion, Manual Examination of the TMJ
- Module 3** Topographic anatomy, manual examination of the craniofacial region, case presentations
- Module 4** MRI of TMJ, training, diagnosis, organ-specific findings
- Module 5** Joint-specific Findings, Splint Production, Diagnostic Therapy and Essentials of Treatment Planning
- Module 6** Developmental physiology, grinding of the splint, therapy planning
- Module 7** Orthodontics, Prosthodontics and Maxillofacial Surgery at CMD
- Module 8** Pain Therapy, Diagnostic-based Therapy Control, Research Forum
- Module 9** Presentation of own cases, discussion, final exam
